

Yuri Zamyatin

Full-Stack developer

Summary

Software engineer with 0.5+ years of commercial experience in Full-Stack development and expertise in architecture/API design. Proficient in JS/TS, Node, SQL/NoSQL. Particularly passionate about Backend development and willing to learn new technologies.

Experience

PRONETCOM FZ-LLC, Moscow

(May 2022 - Present)

as a Full-Stack developer

- Participated in the entire lifecycle of the SFA platform, including development of new features and maintenance of the legacy code based on custom frameworks. The main focus of solutions is on the performance and compatibility (both for client and server), so we could not adopt modern convenient tools and had to create our own ones.
- On a daily basis created solutions that provide client-specific complex analytical reports according to the customer's needs. Accomplished such tasks where an optimal SQL query could take several hours to complete, so that micro-optimizations were a part of my job.

Projects

An up-to-date list is available at yrz.am.

Skills

Languages:

- TypeScript
- JavaScript
- C++

Frameworks:

- Express, EJS, Fastify
- React (familiar)
